

SOLO 461

CORDLESS HEAT DETECTOR TEST KIT

Features

- ▶ Intelligent device, only heats when detector present
- ▶ UL & ULC listed
- ▶ Detector manufacturer endorsed
- ▶ Safe, cable free, battery-powered operation
- ▶ Rapid activation
- ▶ Lightweight and simple to use
- ▶ Universal – suitable for use on most detectors
- ▶ Designed for use at height and at angles
- ▶ Battery powered (supplied with 2 Battery Batons and a fast charger)
- ▶ Suits fixed temperature, rate-of-rise and combination detectors up to 194°F / 90°C.

Description

Functional checking of heat detectors, with a genuine heat source, is now required by major national standards around the world. Testing with heat sources not designed for the purpose can be both dangerous and damaging. The Solo range of Solo Heat Detector Tester equipment, designed specifically for the purpose, provides a genuine professional's solution.

Using the unique IR activation and Cross Air Technology, the Solo Heat Detector Tester, Solo 460 heat generation process takes place only when the detector under test is within the cup with hot air blown horizontally in a focussed beam directly toward the sensor for optimum energy use and results. Interchangeable NiMH battery batons and a fast battery recharger enable testing all day with a cable free professional device.
